About Community Waste Management To create a community waste management model. Development of community waste management mechanism. In the area of Phetchaburi. Amphoe Muang Khampangphet

From the research area to the preliminary data. In-depth interviews with community leaders, sub-district administrative organizations School director Management of Health Promotion Hospital, Tambol Cha-am, Wat and Factory Manager Problems encountered in community waste management. Still lack of campaign Lack of knowledge based on academic principles. Lack of public participation process And the lack of a parish mechanism. In community waste management By removing obstacles. It is a research problem. And research papers to study the concept. Relevant policies, related master plans, solid waste and hazardous waste related data and related laws. In order to understand the conceptual framework as a tool for shaping and developing the legal mechanism. Proper Community Waste Management The data collected from the population and sample were collected from 100 villages, including Wang Chompoo, Ban Root Yao, Maesue Dam, Ban Klongtow, New Developments Baan Roi Yoi in Baan Saeng Tawan and Ban Wang Phet To study the problems and needs of the people. About Community Waste Management in Phetchaburi Province Amphoe Muang Khampangphet The results of the research found that:

1. Problems and needs of the people about the community waste management, Amphoe Muang Kamphaeng Phet Province is the problem of lack of campaign. Knowledge based on academic principles. Process of public participation The public bins are sufficient. The district is a mechanism for community waste management. And people need knowledge in sorting waste according to academic principles.

Garbage bags for household by category Household waste disposal Organize trash bin by location in public. Increasing number of garbage trucks Add time to the garbage service. Increase strict measures for waste community builders in the community to participate in problem solving, planning, policy formulation / policy on community cleanliness. Benefit And evaluation of community waste solutions.

2. Community waste management model in Phetchaburi province. Amphoe Muang Kamphaengphet is a measure to reduce waste and hazardous waste at the source, such as reducing and sorting waste and hazardous waste. Reuse Increasing the potential of storing and transporting solid waste and hazardous waste such as integrated community waste management. Create a waste management model. Cluster should be set up as a waste disposal center because Kamphaeng Phet province has potential waste disposal areas. RDF is ranked No. 35 and the suitable area is the community hazardous waste collection center of the province in order No. 15. 3. The legal mechanism for community waste management within the Tambon administrative organization area. Diamond Chom Phu Amphoe Muang Kamphaengphet Province: Population and sample Agreed with the management of the diamond. Will the district. In the context of community waste management, penalties are fines for violations. The fines will be set up as a community waste management fund. And the draft of the provisions of the management organization of Petch Chumphon District about the management of sewage and solid waste ... The content of the fines to establish a community waste management fund.
